INDIAN INSTITUTE OF TECHNOLOGY INDORE

Knowledge Base for Retrieval-Augmented Generation (RAG)

Purpose: A structured introductory reference document for building and testing an IIT Indore question-answering system.

Prepared: 3 November 2026

Source policy: Institute facts are based primarily on official IIT Indore pages and official IIT-system information. Programme offerings and institutional details can change; consult the linked official pages for current updates.

Suggested use: extract text, split by headings or paragraphs, create embeddings, and store chunks with source metadata.

1. Institute Overview

The Indian Institute of Technology Indore (IIT Indore or IITI) is an Institute of National Importance established by the Government of India in 2009. It is one of the newer Indian Institutes of Technology and is located at Simrol, near Indore, in Madhya Pradesh, India.

The institute began functioning in 2009 from a temporary campus in Indore and was initially mentored by IIT Bombay. It shifted to its permanent campus at Simrol in February 2016. The permanent campus is described by the institute as a residential campus spread over approximately 501 acres.

IIT Indore focuses on education, research, and innovation across engineering, science, and humanities. Its academic environment combines disciplinary education with interdisciplinary research and collaboration.

Quick facts

- **Official name:** Indian Institute of Technology Indore
- **Common names:** IIT Indore, IITI
- **Established:** 2009
- **Location:** Simrol, Khandwa Road, Indore, Madhya Pradesh, India
- **PIN code:** 453552
- **Permanent campus:** Operational since February 2016
- **Campus area:** Approximately 501 acres, as stated on the institute website
- **Institutional status:** Institute of National Importance

2. History and Development

IIT Indore was among the IITs established by the Government of India in 2009. It started academic operations in the 2009–10 period at a temporary location in Indore. IIT Bombay provided initial mentorship during the institute's formative period.

The foundation of the permanent campus at Simrol was laid in February 2009. The institute began operating from the permanent campus in February 2016. The campus brought together academic, administrative, laboratory, library, residential, and student-support facilities.

Since its establishment, IIT Indore has expanded its academic programmes, departments, research infrastructure, and collaborations. Its development has included work in engineering, basic sciences, biomedical areas, sustainability, and humanities and social sciences.

3. Location and Campus

IIT Indore is situated at Khandwa Road, Simrol, Indore, Madhya Pradesh 453552, India. Simrol is outside the central urban area of Indore. The institute's official address should be used for formal correspondence and navigation.

The permanent campus is residential and includes academic buildings, laboratories, lecture spaces, student residences, a central library or Learning Resource Centre, administrative facilities, dining facilities, health services, and sports infrastructure.

Campus facilities

- **Academic buildings:** Spaces for teaching, seminars, academic administration, and departmental activity.
- **Laboratories:** Departmental teaching and research laboratories supporting experimental and computational work.
- **Learning Resource Centre:** The central library and learning resources.

- **Student residences:** Hostel accommodation and residential facilities.
- **Lecture and event spaces:** Lecture halls, seminar spaces, and an auditorium.
- **Student support:** Health, dining, sports, and other campus services.

Facility names, access rules, operating hours, and availability may change. A RAG assistant should avoid claiming real-time availability unless connected to an up-to-date official source.

4. Academic Structure

IIT Indore offers undergraduate, postgraduate, doctoral, and selected dual-degree programmes. Its academic structure includes departments, schools, and interdisciplinary centres. The institute's academic website provides the authoritative source for current programme names, eligibility, course structures, academic calendars, and notices.

Broad programme categories

- **Undergraduate:** Bachelor of Technology (B.Tech.), Bachelor of Design (B.Des.), and Bachelor of Science (B.S.) programmes.
- **Postgraduate:** Master of Technology (M.Tech.), Master of Science (M.Sc.), MS by Research, and Master of Arts (M.A.) programmes.
- **Doctoral:** Doctor of Philosophy (Ph.D.) programmes across multiple disciplines.
- **Dual degree:** Selected integrated or conversion pathways, such as B.Tech.–M.Tech. and postgraduate-to-Ph.D. options, subject to programme rules.

Programme availability and admission requirements vary by academic year. Applicants should verify the current admission brochure and official academic notifications rather than relying on an older summary.

5. Departments and Academic Disciplines

IIT Indore's academic offerings span engineering, science, biomedical disciplines, mathematics, and humanities and social sciences. The following list gives a broad orientation to major academic areas; it is not a substitute for the current official department directory.

- **Computer Science and Engineering:** Computing, algorithms, software, systems, data, and related research.
- **Electrical Engineering:** Electrical and electronic systems, communications, signal processing, control, power, and related areas.
- **Mechanical Engineering:** Thermal sciences, manufacturing, design, mechanics, and industrial engineering.
- **Civil Engineering:** Civil and infrastructure engineering and related research.
- **Metallurgical Engineering and Materials Science:** Materials, metallurgy, and materials engineering.
- **Chemical Engineering:** Chemical processes and associated engineering and research.
- **Biosciences and Biomedical Engineering:** Biological sciences, bioengineering, and biomedical technologies.
- **Physics:** Fundamental and applied physics.
- **Chemistry:** Chemical sciences and interdisciplinary materials and molecular research.
- **Mathematics:** Pure and applied mathematics, mathematical modelling, and computing-related study.
- **Humanities and Social Sciences:** Disciplines including economics, English, history, philosophy, psychology, and sociology.

- **Astronomy, Astrophysics and Space Engineering:** Astronomy, astrophysics, and space-related engineering and research.
- **Sustainability:** Interdisciplinary education and research related to sustainable development.

6. Research and Innovation

Research at IIT Indore covers fundamental and applied questions across science, engineering, technology, and humanities. The institute describes research priorities that include artificial intelligence, advanced materials, communications, renewable energy, healthcare technologies, and environmental sustainability.

Research activity is supported by departmental laboratories, shared facilities, interdisciplinary centres, faculty research groups, and collaborations with external institutions. Projects may involve theoretical work, simulations, experiments, prototypes, publications, patents, or technology development.

Examples of broad research themes

- Artificial intelligence, machine learning, data science, and computational methods.
- Communications, electronics, signal processing, and intelligent systems.
- Advanced materials, nanotechnology, and electronic materials.
- Renewable energy, power systems, and sustainability.
- Healthcare technologies, biosciences, and biomedical engineering.
- Astronomy, astrophysics, and space science and engineering.
- Environmental sustainability and interdisciplinary societal challenges.

These are broad research themes, not a guarantee that a specific project, laboratory, instrument, or faculty member is currently active. For precise information, consult the relevant department and research centre pages.

7. Electrical Engineering at IIT Indore

Electrical Engineering is one of IIT Indore's founding academic disciplines and has been part of the institute since 2009. The department contributes to undergraduate and postgraduate teaching, doctoral research, and interdisciplinary projects.

The discipline broadly covers electrical and electronic systems, communication and signal processing, control, power and energy, devices, and related areas. Exact research groups, faculty interests, laboratory equipment, and programme details should be checked on the department's official website.

For a student-facing RAG assistant, questions about course registration, grading, examinations, attendance, degree requirements, and departmental rules should be answered from current official academic documents rather than inferred from general department descriptions.

8. Students and Campus Life

IIT Indore's residential campus supports academic and student life through hostels, dining, sports, health services, learning resources, and shared campus spaces. Students participate in academic activities, research projects, student groups, technical events, cultural activities, and sports.

Student organisations and event schedules can change from year to year. A RAG system should use current official student-affairs or club announcements when answering questions about event dates, registrations, club leadership, or facility timings.

Common student information needs

- Hostel allocation, residence rules, and mess information.
- Academic calendar, examination schedules, and course registration.
- Scholarships, financial assistance, and fee notices.
- Internships, placements, and career development.
- Student clubs, technical activities, cultural events, and sports.
- Health services, campus support, and administrative contacts.

9. Admissions and Academic Information

Admission routes depend on the programme. Undergraduate engineering admissions, design admissions, postgraduate admissions, and doctoral admissions may use different national examinations, institute processes, eligibility criteria, and selection procedures.

Applicants should consult the relevant official admission portal and the current-year brochure. This document intentionally does not provide cut-offs, fees, deadlines, seat counts, or eligibility thresholds because those details are year-specific and can change.

Useful official academic resources

- Academic programmes and course structures.
- Academic calendar and semester schedules.
- Course syllabi and curriculum documents.
- Academic rules, ordinances, and regulations.
- Scholarship and fee notifications.
- Internship and exchange programme information.

10. Administration and Contact

Postal address:
Indian Institute of Technology Indore
Khandwa Road, Simrol
Indore, Madhya Pradesh 453552
India

Administration email listed on the institute website: administration@iiti.ac.in

Security Helpdesk: +91-731-6603117

Administration Section: +91-731-6603547

Contact numbers and email addresses can change. Confirm them on the official institute website before relying on them for urgent or formal matters.

11. Frequently Asked Questions

Q: What is IIT Indore?

A: IIT Indore is the Indian Institute of Technology Indore, an Institute of National Importance established by the Government of India in 2009.

Q: Where is IIT Indore located?

A: IIT Indore is located at Simrol on Khandwa Road, Indore, Madhya Pradesh 453552, India.

Q: When was IIT Indore established?

A: IIT Indore was established in 2009 and began functioning in the 2009–10 period.

Q: When did IIT Indore move to its permanent campus?

A: The institute began functioning from its permanent campus at Simrol in February 2016.

Q: How large is the IIT Indore campus?

A: The institute describes its residential campus as approximately 501 acres.

Q: What programmes does IIT Indore offer?

A: The institute offers undergraduate, postgraduate, doctoral, and selected dual-degree programmes. Examples include B.Tech., B.Des., B.S., M.Tech., M.Sc., MS by Research, M.A., and Ph.D. Check the current academic website for the latest list.

Q: Does IIT Indore have an Electrical Engineering department?

A: Yes. Electrical Engineering is one of the institute's founding departments and has been part of IIT Indore since 2009.

Q: What research areas are pursued at IIT Indore?

A: Broad research areas include artificial intelligence, advanced materials, communications, renewable energy, healthcare technologies, environmental sustainability, and other areas across science and engineering.

Q: Does IIT Indore have hostels?

A: The permanent campus is residential and includes student residence facilities. Hostel allocation and rules should be checked through current institute notices.

Q: Where can I find the official academic calendar?

A: The academic section of the IIT Indore website provides academic calendar information and related academic resources.

Q: What is the official postal address?

A: Indian Institute of Technology Indore, Khandwa Road, Simrol, Indore, Madhya Pradesh 453552, India.

Q: Which source should I use for current admission deadlines?

A: Use the current official admission portal and admission brochure for the specific programme and academic year.

12. Official Sources and Further Reading

The following official or institution-level pages were consulted when preparing this introductory knowledge base. Use these pages as source documents for updates and deeper retrieval.

13. Notes for RAG Implementation

- **Chunking:** Split on numbered headings and then by paragraph. Keep each FAQ question with its answer in the same chunk.
- **Metadata:** Store fields such as source_url, section, document_title, and last_verified_date with each chunk.
- **Grounding:** Instruct the answer model to answer only from retrieved passages and say when the source does not contain the answer.
- **Freshness:** Re-crawl official academic, admission, placement, and notice pages regularly. Deadlines, fees, course offerings, contacts, and policies are not static.
- **Precision:** Do not treat this overview as an authoritative policy document. For rules and procedures, retrieve the original circular, ordinance, handbook, or notice.
- **Attribution:** Return the source title or URL with answers whenever possible.

End of document.
